

## Panel Discussion

### Questions for discussion:

- We are encouraged to use AI to support our tasks and to guide researchers in utilizing AI in their work. How can we ensure the accuracy of the information provided by these AI tools?
- How will the AI explosion and growing use of AI impact our jobs overall? What about job security?
- What types of training opportunities for librarians and library staff do you think are most valuable?

## Panel Discussion

### Questions for discussion:

- How do you make certain that the use of AI in your library is ethical, respects user privacy, and aligns with professional values?
- How does your library collaborate with other campus units to foster education and awareness around AI?
